

HOAN DINH

Los Angeles, CA | (323) 629-5520 | hoandinh041094@g.ucla.edu

SUMMARY

Analytics leader who starts with the business, not the data. I learn how the P&L actually works, then point the team at the KPIs that move it: forecasting, share of wallet, promo efficiency, and budgeting. Six years across sports betting and insurance. Now lead Commercial Analytics at FanDuel, where I manage 2 analysts and rebuilt the function from ad hoc Excel work into governed, versioned pipelines in Python, SQL, and Databricks. M.S. Applied Mathematics (4.0 GPA), B.S. Financial Actuarial Mathematics from UCLA.

EXPERIENCE

Commercial Analytics Manager

January 2025 to Present

FanDuel

- Manage 2 analysts covering Commercial, Marketing, Acquisition, Finance, Product, and Ops and set the review standards every deliverable ships against.
- Own the commercial budget and forecast with Commercial, Marketing, and Acquisition. Forecasts cover \$3Billion in annual handle and land within 5% of actuals, which is what leadership plans spend and headcount against.
- Rebuilt marketing bonus and promo strategy on a measured efficiency framework, \$20M annually that was not targeting cohorts on a model and analytics framework.
- Replaced an open request queue with a quarterly roadmap tied to commercial priorities. Recurring reporting turnaround dropped from 3 days to 30 minutes and freed 30% of team capacity for proactive work.
- Moved the function off Excel and onto governed pipelines in Python, SQL, Databricks, Unity Catalog, and GitHub, so numbers are versioned, reproducible, and owned rather than rebuilt every cycle. Reusable AI workflows now automate reporting, forecasting, and ad hoc analysis, cutting 20 hours per week of manual work.
- Own the Yipit data partnership and the share of wallet read on competitive position, presented to leadership and used to drive marketing, media, and acquisition spend to target in order to gain dominant market share.
- Lead analytics strategy for Project Play Shift and built the analytical framework behind the racing Long Term Model with Strategy.

Commercial Senior Analyst

March 2022 to January 2025

FanDuel

- Built the baseline forecasts for racing handle, revenue, and actives that became the planning standard for the vertical.
- Rebuilt the weekly performance report and took the read straight to stakeholders, replacing a description of what happened with a recommendation on what to do next.
- Sized Racing's contribution to the wider FanDuel business as share of wallet, which reframed how the vertical was valued in planning and investment discussions.
- Ran ad hoc analysis on scheduling, promos, and market drivers for Marketing, Acquisition, and Finance.

Product Analyst

June 2020 to February 2022

Farmers Insurance

- Built pricing models and dashboards that leadership adopted for premium and rate decisions across four states.
- Automated manual reporting workflows in Python and analyzed customer policy data in SAS, SQL, and Python, cutting 2 hours of recurring analyst time.

EDUCATION

California State University, Long Beach | M.S. Applied Mathematics, GPA 4.0 / 4.0 December 2020

University of California, Los Angeles | B.S. Financial Actuarial Mathematics June 2016

SKILLS & CERTIFICATIONS

Technical: Python, SQL, R, C++, MATLAB, Databricks, Unity Catalog, GitHub, Tableau, Power BI, Excel (VBA)

AI tooling: Claude, Claude Cowork, Cursor, OpenAI API

Actuarial exams: Probability (P), Financial Mathematics (FM), Financial Models (3F)
